

Board: The board is the same as the original Irving Finkel version, but has echoes that stretch the middle line that send you the distance from the middle of a d6 die. For example, landing on a 5 sends you forward two spaces. Each time somebody moves from a space, they leave an echo. The middle plus with an echo can send you all the way back of 1-3 or all the way forward if 4-6.

Dice: Later, I plan to use the original pyramid die for the rolling of moves and the d6 for the echoes, but right now its 1-4 for move or 5-6 for skip.
